NEXUS Community

About Us

Our website is a platform focused on academic growth and self-study for learners. We provide high-quality, well-researched content that supports academic success and fosters community building.

Our goal is to create a space where students in the same field can freely share knowledge, collaborate, and stay connected. Through this platform, we hope to foster a supportive network where senior and junior students can learn from one another and grow together.

At REAN, we believe that each student brings unique knowledge and perspectives that can enrich the learning experience for others, turning education into a collaborative and supportive journey.

Our platform is designed to enable students to share valuable resources, insights, and guidance, creating a dynamic environment where self-study becomes a collective effort towards academic excellence.

By fostering connections between students within similar fields, we strive to cultivate a thriving network where senior and junior learners can uplift and learn from one another, ensuring continuous growth and success for all.

NEXUS Community

Our Motivation

In this community, every challenge transforms into a stepping stone, and every success becomes a shared celebration. Together, we learn, grow, and empower one another—because when we unite with a common purpose, there's no dream too big and no goal out of reach!

NEXUS Community

Problem Statement

As former first-year students, we know firsthand the challenges that come with starting out. Now, we're committed to helping alleviate those difficulties for our younger peers.

Information Overload

With so much information available online, students can feel overwhelmed and struggle to identify what's relevant or credible for their specific field.

Difficulty in Finding Peer Support

Many students feel isolated in their studies, especially if they don't know classmates well, making it hard to find study partners or peer encouragement.

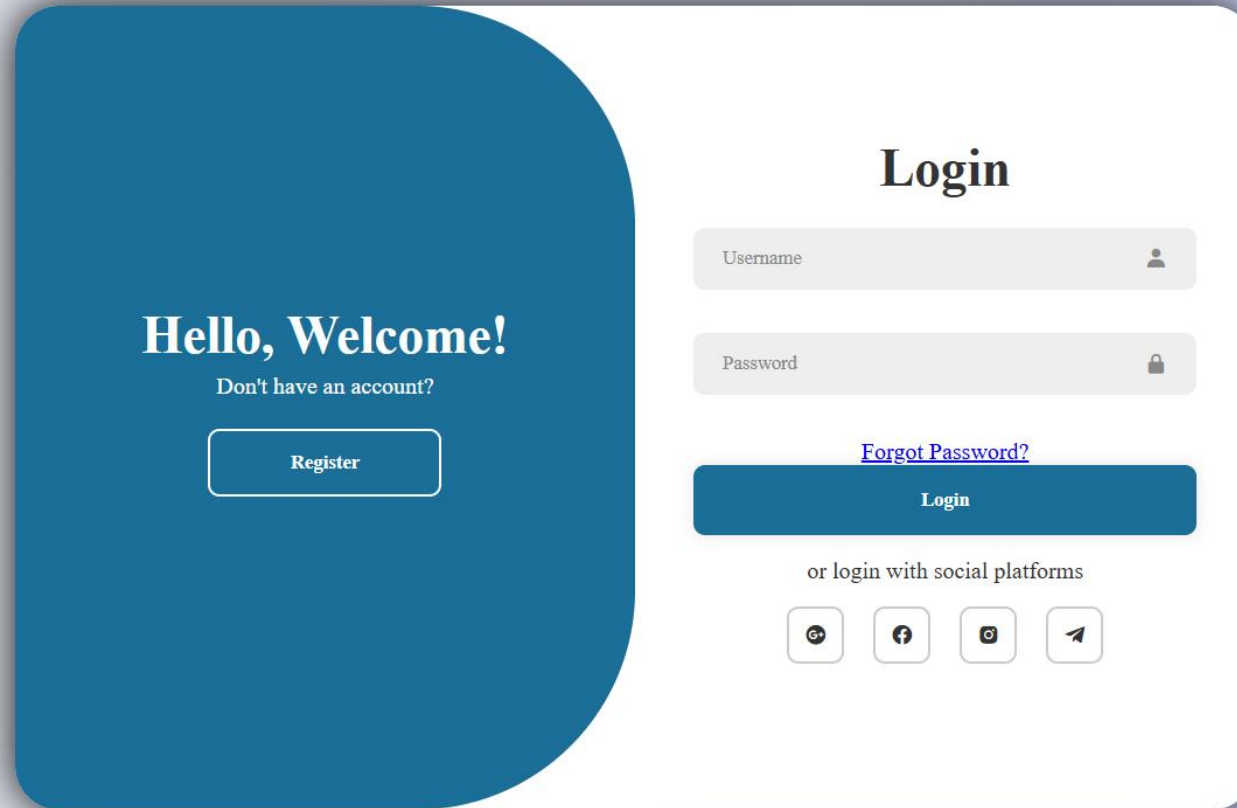

Unclear Pathways for Academic and Career Guidance

Students often need tailored guidance on academic and career paths in their specific field, but don't know who to turn to for accurate, field-relevant advice.

2.Login Page

A login page design mockup featuring a white card with rounded corners on a light purple background. The card is divided into two main sections. The left section has a dark blue background with a white rounded rectangle containing the text 'Hello, Welcome!' in a large serif font, followed by 'Don't have an account?' in a smaller sans-serif font, and a white 'Register' button. The right section has a white background and contains the title 'Login' in a large serif font. Below the title are two input fields: 'Username' with a person icon and 'Password' with a lock icon. A blue 'Login' button is positioned below these fields. Above the button is a blue link 'Forgot Password?'. Below the button is the text 'or login with social platforms' followed by four social media icons: Google+, Facebook, Instagram, and Telegram.

I don't know what happend with my code. I try to fix it but i still can't make it work. Can anyone help me please?

```
set1 = self.filter(from_user=user).select_related(depth=1)
set2 = self.filter(to_user=user).select_related(depth=1)
return set1 | set2

def are_connected(self, user1, user2):
    if self.filter(from_user=user1, to_user=user2).count() > 0:
        return True
    if self.filter(from_user=user2, to_user=user1).count() > 0:
        return True
    return False
```

What does it mean? I try to do research about it but still couldn't understand.

The screenshot shows a Windows command prompt window titled "Administrator: X:\windows\system32\cmd.exe". The text inside the window is as follows:

```
Microsoft Windows [Version 10.0.10240]

X:\windows\system32>bootrec /scanos
Scanning all disks for Windows installations.

Please wait, since this may take a while...

Successfully scanned Windows installations.
Total identified Windows installations: 0
The operation completed successfully.

X:\windows\system32>bootrec /fixmbr
```

Two red rectangles highlight the commands `bootrec /scanos` and `bootrec /fixmbr`. A large blue arrow points from the right side of the image towards the `bootrec /scanos` command.
